Africa and the World

FOIAB3B

Charles Howard reports . . .

CPYRGHT

THE CIA IN AFRICA

. . . from New York

IN the last few months millions of words have been written about CIA activities in the U.S.A., but not a line about CIA activities in Africa. Yet it is in Africa that CIA actions have been most devastating.

The CIA as an arm of American foreign policy working in conjunction with British Intelligence has made shambles of African independence.

Today there is not a single African leader with any sense of security left except those who have completely bowed to their former colonial masters and have sold out their freedom and their people lock, stock and barrel.

Independent-minded African leaders know that every minute outside forces are at work within their country working for their downfall or to undermine their standing with their people—and they know full well that the contest is an unequal one and any day they may fall.

Power Structure

To understand all this you must understand how the Western "power structure" works. American top level governmental officials—the President, the Vice President, Secretary of State, Head of African Section of the State Department, all make wonderful speeches about freedom, democracy, justice, equality, helping the underprivileged, God and all that junk in Africa. While under their direction and with their knowledge, forces are at work in Africa completely destroying democracy, preventing justice and equality to the Africans, making the underprivileged more underprivileged, the poor poorer and caring less about God than the wind it takes to mention his name.

American officials, businessmen, and church people are the greatest speech makers, phrase makers and cliché inventors on the face of the earth, while at the same time controlling, directing and manipulating a devilish mechanism that denies and takes away from the Africans with the other hand every right, that the officials, businessmen and church people proffer with the other.

Look at Africa today—independence and freedom in Africa is in shambles and the American CIA is its principal vehicle of devastation. Ten military coups in Africa in the last few years. Everything honest and sincere that African leaders have built to better themselves and their fellowmen has been destroyed.

The Organization of African Unity (OAU) is dead. Dedicated African leaders, nearly all of them, have been destroyed and the few who have survived are only hanging on by the skin of their teeth and others are still falling now one at a time and the CIA is the principal architect of their downfall.

If you have any idea that these military coups are not the handiwork of a "central masterminded group" you are simply uninformed on the "facts of life" in Africa. No African leader has a scintilla of doubt about it. Those that have survived have mostly simply "bowed to the inevitable."

Why was Dean Rusk, American Secretary of State, after the fall of Nkrumah, able to predict so accurately that other African governments would fall? I'll tell you why, because he controls the greatest weapon for the destruction of African governments ever invented, the American CIA, which works hand in hand with British Intelligence. And after the overthrows Rusk calmly remarks "the climate for our investments is better there now."

Central Goal

And what is the central goal of all this? It is the continued ownership and control of the fantastic mineral, agricultural and natural resources wealth of that unhappy continent and the maintenance of an African population not manufacturing their own goods but compelled to buy them from American and British manufacturers.

Joining in this "rape of Africa" is the American government, the American press, the American businessman and the American church forces. They all will scream to the high heavens that it isn't so. Well it is so. Of course

every member of the government, the American press, every American businessman and every American churchman is not a participant in this diabolical scheme, but it is true of the "controlling forces" in all these agencies.

Some Joke!

Excellent examples of American character in action in Asia and Africa are demonstrated by Bob Hope and Cardinal Spellman. Bob Hope, an English-born American movie idol, goes to Vietnam and says the napalm bombing, military devastation of innocent Vietnamese men, women and children is the "greatest slum clearance of the century" and Americans applaud, scream and shout their approval.

Cardinal Spellman, who some New Yorkers say is the most powerful political figure in New York, goes every year to Vietnam, and of all times at Christmas, and demands more killing of the Vietnamese people and an American military victory. These two are staunch supporters of CIA policies and Americans applaud them both.

The voice of the dissenters is simply ineffective. Look at South Africa, South West Africa, Angola, Mozambique and Southern Rhodesia!

The church forces are the leaders in supporting what is going on in all these areas. The businessmen are furnishing millions of dollars to maintain what goes on there.

The U.S. Government pronounces out of one side of its mouth sweet speeches and clichés, while at the same time pours in millions of dollars in financial aid, and millions of dollars in military aid, making these areas the strongest economic and military forces in all of Africa, while pauperising the rest of Africa.

The Africans in South Africa and all the areas it touches are slaughtered at will and nobody does anything about it. If an African leader attempts to do anything about it, he soon finds himself dead or a refugee from his homeland.

The U.S.A. is spending 25 billion
